

The highly versatile 40-cell braille organizer

The organizers in the Pronto! range offer more than just general features such as note taking or managing appointments. Pronto! 40 V4 offers all that and much more. A naturally human sounding speech output makes Pronto! 40 V4 a pleasure to listen to. There is a choice of inputs as well. Use either a braille or QWERTZ keyboard; you get both with your Pronto! 40 V4. It has other useful features too, including email, web browser, ftp- and Dropbox-connection to let you stay in touch with people, anytime and anywhere. Pronto! 40 is your mobile organizer at work, at home as well as on the road.

- Interchangeable braille or standard (QWERTZ) keyboard for inputting
- 40-cell braille display with integrated cursor routing
- WLAN with WPA2, SDHC card slot
- USB-connection and 4 Bluetooth connections
- Natural-sounding speech output
- Set up IMAP or POP email-accounts to read and write e-mail, surf the web, etc.
- Manage addresses, notes, files, etc.

Pronto! 40 helps you keep track of all your important appointments, record voice messages, locate addresses and phone numbers quickly...

Pronto! 40 V4 features interchangeable braille and standard (QWERTZ) keyboards

Pronto! 40 V4 offers two methods for inputting: “My organizer must be powerful. I need a braille keyboard and a 40-cell braille display at school, whereas in my spare time I would prefer a standard (QWERTZ) keyboard because I can chat faster that way. Also I don’t want to lug around too many devices. Ideally I want an organizer that I can also use like a notebook.”

Does this sound familiar? People who demand a lot from their organizer would certainly find that the Pronto! 40 V4 delivers. This high quality device can act as a laptop substitute.

The 40-cell braille display is an integral part of the device and fitted with cursor routing. The internal memory of 32 GB Flash is expanded by a SDHC-card of 4 GB included in the package. The built-in long-life Lithium-ion battery only requires recharging after 20 hours of use. Furthermore, Pronto’s silver metallic spray-painted aluminum housing gives it an exclusive and elegant appearance.

The integrated 40-cell braille display of Pronto! 40 can be used also as a normal refreshable braille display with your PC, laptop, iPad or iPhone. Pronto! 40 V4 features BAUM’s legendary simultaneous device connectivity. Thanks to a USB and four Bluetooth connections, you can connect Pronto! to all of your devices, and remain connected to them. A command on Pronto! lets you switch from one device to the next, and back again. This means it is possible to switch quickly from your notebook to your smartphone to rapidly type an SMS, and then switch back to your computer to resume your work.

Switching the input between braille and a standard keyboard simply by exchanging the keyboard module.

The powerful Pronto! 40 is suitable for use at work, at school for training and at home.

4 Bluetooth channels and a USB port allows to connect with 5 devices at the same time.

...connect to your iPhone with VoiceOver, read your notes or PDF documents, listen to your favorite music, and much more.

BAUM

Reliability-proven: Pronto-software with many functions:

Write texts and edit documents with the text-editing program; even **doc and docx** format.

Surf via **WLAN**, read your emails, send and receive email attachments.

Make appointments, record addresses, and take notes.
