BAUM

The new  
braille display  
Vario 340

## The compact braille display for home and office

The Vario 340 is a high quality yet affordable 40-cell braille display for computer users in need of a compact, lightweight solution for use with computers at home, work, or school. Like other BAUM braille displays, Vario 340 is a Human Interface Device (HID), which means a driver does not need to be installed to use it. Vario 340 features a reversible USB Type C port, which means it doesn't matter which direction the USB plug is facing. Vario 340 has everything you need for quick access to information. Plus, it's easy and comfortable to use.

- Compact, lightweight and elegant
- Easy and comfortable to use
- Human Interface Device (HID)
- New USB Type C port
- 40 braille cells with integrated cursor routing
- Practical function keys
- High quality, robust housing

# Vario 340

The compact braille display  
for home and office

The compact Vario 340 impresses with its simple yet functional design, with the high quality BAUM is known for. The 40 braille cells are embedded in a solid metal casing that is robust and durable. Navigation and operation is achieved via 6 function keys; there are 3 on each side of the braille display. Vario 340 is so power efficient that a battery is not needed. Just connecting via USB to your computer is all you need.

Using Vario 340 is very easy. Simply connect the supplied USB Type C cable to your Windows PC and you're ready. No device drive is needed. Vario 340 automatically detects the operating system, and can be used in conjunction with COBRA screen reading software, or with JAWS. Unlike micro or mini USB connectors, the Type C USB port means not worrying about which direction the USB connector is facing.
